Deployment

Data Vista offers cost-effective technology deployment services to warehouse, stage, configure, test, ship, and install products; enabling customers to achieve cost savings, flexibility, and speed to market.

Staffing Fulfillment

Data Vista provides staffing to help customers in a number of areas:

- Handling of product to reduce customer expenses for leasing space and fixed costs of operations
  - Reduce customer expenses for obtaining personnel experienced with certain technologies.
  - Reduce risk associated with new markets/products
- Freeing up of time investment to focus on core business priorities

Warehousing

Data Vista's 20,000 square feet of warehousing space and support resources can be utilized in a variety of ways to facilitate a customer's requirements for storage and inventory, those benefits include:

- Flexibility of operations
- Streamlined receiving of equipment at Data Vista's staging center
- Confirmation of model types and quantities received vs. shipping data
- Inventory management with 24x7 online web access
- Tracking for part numbers, lot codes, and other data
- Picking and packing of orders, as well as QA verification
- Preparation of products for installation

Staging/Configuration/Testing

Once products have arrived at Data Vista's expansive storage facility, our dedicated employees are able to stage, configure, and test to customer requirements:

- Initial power-up of equipment and performance of manufacturer-specified test procedures
- Configuration of equipment to client-specified parameters and protocols
- Application of standard 24-hour burn-in period and verification of equipment operation after burn-in

Shipping

Data Vista's shipping services include:

- Repackaging of equipment with original manufacturer-supplied documentation and customer supplied configuration information
- Labeling, bagging, boxing, and stretch wrapping of products for shipment
- Disassembly, reassembly and repackaging of products
- Outbound order picking and packing
- Tracking and monitoring of deliveries

Implementation

After product(s) have been shipped, Data Vista provides services for the following activities:

- Site survey to assess the optimal placement of servers, storage, and/or network devices to obtain the maximum performance efficiency and coverage
- Cabling of devices to create a wired or wireless environment
- Installation of devices
- Testing to ensure devices are communicating within site and to remote site
