2.1   ENVIRONMENTAL, HEALTH and SAFETY POLICY

ISO 14001 and R2, and OHSAS 18001
ENVIRONMENTAL, HEALTH and SAFETY POLICY

DataVista strives to protect the environment, conserve natural resources, and to be an exemplary corporate citizen. To accomplish this, DataVista is committed to:

- Reduce our energy and material consumption by reusing items and recycling when possible;

- Reduce the environmental, health and safety impact associated with our products and activities;

- Managing used and end of life electronics based on a "reuse, recover, recycle" hierarchy both onsite and throughout the recycling chain.

- Prevention of injury and ill health for our workers and our community.

- Comply with applicable local, state and federal regulatory requirements;

- Annually review the objectives and targets of our environmental, health and safety management system to reduce waste and the consumption of materials, energy and resources;

- Continually improve our performance strategy to prevent pollution whenever possible;

- Communicate and train our employees, and those who work directly on our behalf, to carry out our environmental, health and safety policies; and

- Make our Environmental, Health and Safety Policy available to the public.
